

Subtracting a 1 digit number from a 2 digit number

Share

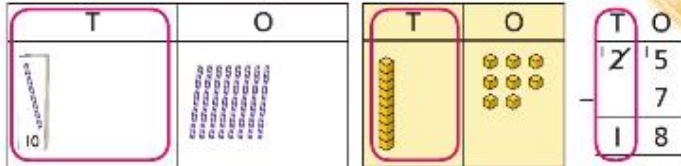

a)

I looked at the ones column first. I exchanged  for  so I could subtract 7.

Next, I subtracted the tens. 1 ten subtract 0 tens is 1 ten.

$$25 - 7 = 18$$

Amy has 18 straws left.

$$25 - 7 =$$

Look at the yellow denes

Pic 1 – Layout Tens and Ones

Pic 2 We **always** start with the ones

Here we need to exchange a ten for ones and then do the calculation and write the answer (**15-7=8**)

Pic 3 Then go over to the tens and do the subtraction

$$1 \text{ ten} - 0 \text{ tens} = 1 \text{ ten.}$$

$$25 - 7 = 18$$
